## **PIPE SET CLAMPS & RATCHET CLAMPS**

**We produce Pipe Set Clamps for pipes from 2 inch up to 100 inch. These mechanical and/or hydraulic clamps come in standard and no-tack versions.**

**Our Ratchet Clamps are also available in standard and in no-tack versions. Standard versions from 6" up to 64". No-tack versions from 8" to 64".**

## INTERNAL PRE-HEATERS

**We produce internal pre-heaters from 12", 24", 36", 42", 46" and 56".  
These heaters are equipped with resp. 6, 8, 10, 12, 16 or 18 burners.**

## PIPE SUPPORTS

**We produce a wide range of pipe supports for tubes from 16" up to 48".  
These pipe supports are produced in The Netherlands and are CE-compliant.**

**The electric pipe-supports enable the worker to easily position the pipe for welding.  
The engine's speed is adjustable.**

**The whole construction has been designed for a weight of 5000 kg per support. Its height is  
hydraulically adjustable. The pipe support has a 12 months warranty period and comes with a manual.**

## **WELDING TENTS WITH OPTIONAL VENTILATION UNIT**

**Our high quality aluminum tents are produced in The Netherlands. This lightweight and robust time-saver has adjustable legs for normal surfaces and adjustable wheels for easy tent-transport on the pipeline. The model shown below has been produced for 48 inch to 56 inch pipes. The tent structure and tent-cloth weigh 42 kg. Including the optional ventilator will bring the total weight to 64 kg.**

## PRE-HEATING RINGS

Below you will find pictures of our 48 inch stainless steel pre-heating ring. The control box provides a menu that enables you to set a time in combination with a specific temperature. It can, for instance, be programmed to heat-up the pipe to 150 degrees Celsius within a time frame of 3 minutes.

## WELDING NIPPLES

**We produce welding nipples in dimensions up to 48 inch.  
We produce V-seams, J-seams and U-butt-joints.  
Dimensions can be custom made.**
